# Delivering a Reliable Solution

for your plastic bag disposal challenge

## How will you adjust to the new challenges of recycling?

95% of U.S. healthcare laundry service plastic waste goes to China, but that country's "Operation Green Fence" imports-enforcement campaign has clamped down on unwashed and contaminated materials.

*95% of U.S. healthcare laundry service plastic waste goes to China, but they have tough new restrictions.*

This has sent ripples through the North American recycling supply chain. The Chinese government has already rejected nearly a million tons of recyclables and has cancelled the import licenses of hundreds of recycling companies. This year, China launched a new initiative called "National Sword" which will target "foreign waste," including plastics. In this uncertain environment, you need a reliable solution for your plastic bag disposal that will meet import requirements.

**Streamline Solutions is the answer.**

## The Triple-Point Solution

1

### We'll Reduce Your Trash Removal Costs

If you are using your trash removal service for your plastic bag disposal, you're adding unnecessary costs to your business. With our recycling program, we will pick up your plastic bags and eliminate those extra costs.

2

### We'll Help You Meet Hospital Green Initiatives

With our turnkey recycling program, you can now tell your customers that you are helping meet their "Green Initiative Goals". By implementing our baler, vacuum system and pickup service, you further solidify your business relationship with hospitals and create your own sustainability program.

3

### We'll Increase Your Revenues

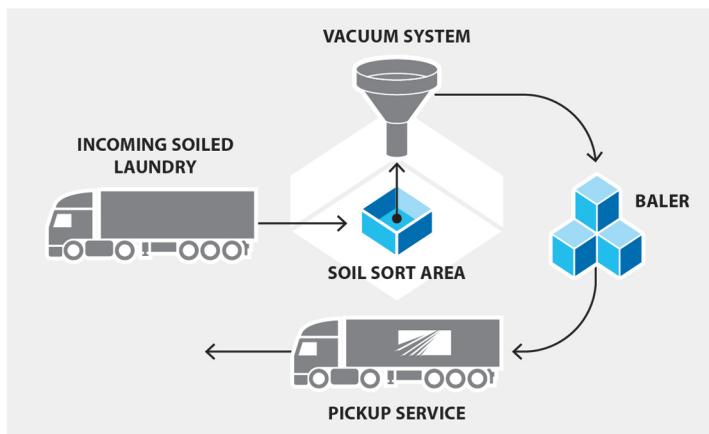

Whether you are selling soiled linen bags to hospitals or not, our competitive pricing coupled with our hamper stand program can increase your bottom line and help win new business.

# Recycling and More: The Total Solution

## Turnkey Plastic Recycling Program

Our recycling program includes a baler, vacuum system and pick-up service. This solution eliminates the headaches for plastic disposal while giving your business a better brand image in your community and to your customer base.

- **Vacuum System** – Our vacuum system will help you reduce your labor costs. There is no longer a need to have dedicated workers constantly moving plastic bags from your soil sort area to your baler. And we offer our vacuum system at a cost less than that of competitors, to assure you an even faster return on investment.
- **Baler** – Streamline Solutions will install a baler at your facility as long as you are purchasing our plastic bags. This allows soiled linen bags of all colors, sizes and styles to be recycled more efficiently.
- **Free Pickup** – Once you have the agreed upon number of bales, call our office and, at no cost, we'll send a truck to pick them up and reclaim the plastic into reusable pellets.

**Take a few minutes to fill out the enclosed form and we'll let you know how much you can save!**

## The Finest Linen Bags in the Healthcare Marketplace

Streamline Solutions offers extremely high quality disposable soiled linen bags in an array of sizes, colors and styles to satisfy the needs of your hospital customers. Our linen bag prices are extremely competitive. We'll even train your sales people and provide them with co-branded collateral to help win and keep the business.

- **The highest quality bags available in the healthcare marketplace**
- **Works great with heavy and wet loads**
- **All colors, sizes and materials available**
- **Regular and draw-tape versions**
- **Stock and custom bags available to fit your specific needs**
- **Printed and non-printed**
- **All bags work perfectly with our laundry hamper stands**

If you are currently in a contract with another soiled linen bag supplier, we'll help you resolve it, so you'll no longer be locked into a long-term contract.

## Hamper Stand Program

**If you purchase our soiled linen bags, we offer a true-cost program where you will have ownership of the hamper stands.** If your laundry contract with a hospital does not include supplying linen bags, then here is a competitive advantage that will help win that business, since hamper stands are typically a costly capital expense for hospitals.
