Extraction

Baling

Recycling

**Vacu-Stream System**

# Vacu-Stream System

Our flexible linen bag extraction system removes soiled linen bags from the soil line and transports them directly to the baler.

This reduces labor, keeps workspaces cleaner, and reduces linen loss.

## Plastic Bag Vacuum System

This system consists of a series of specially designed material collection hoods which are typically mounted in the ceiling of the laundry above the soil sort belts or above soil sort workstations. The operator simply offers the plastic bag to the hood and it is automatically sucked away to a specialized baler. This solution is ideal for commercial laundries where plastic bags and sorting lines consist of high speed and large volumes.

## Laundry

## System Benefits:

- ▶ Reduced Labor Costs
- ▶ Less Linen Loss
- ▶ Clean Working Environment
- ▶ Reduced Employee Injuries
- ▶ Recycling
- ▶ Improved Energy Efficiency
- ▶ Improved Productivity

# Delivering a Reliable Solution

for your plastic bag disposal challenge

## Triple Point Solution

### We'll Reduce Your Trash Removal Costs

If you are using your trash removal service for your plastic bag disposal, you're adding unnecessary costs to your business. With our recycling program, we will pick up your plastic bags and eliminate those extra costs.

### We'll Help You Meet Hospital Green Initiatives

With our turnkey recycling program, you can now tell your customers that you are helping meet their "Green Initiative Goals". By implementing our baler, vacuum system and pickup service, you further solidify your business relationship with hospitals and create your own sustainability program.

### We'll Increase Your Revenues

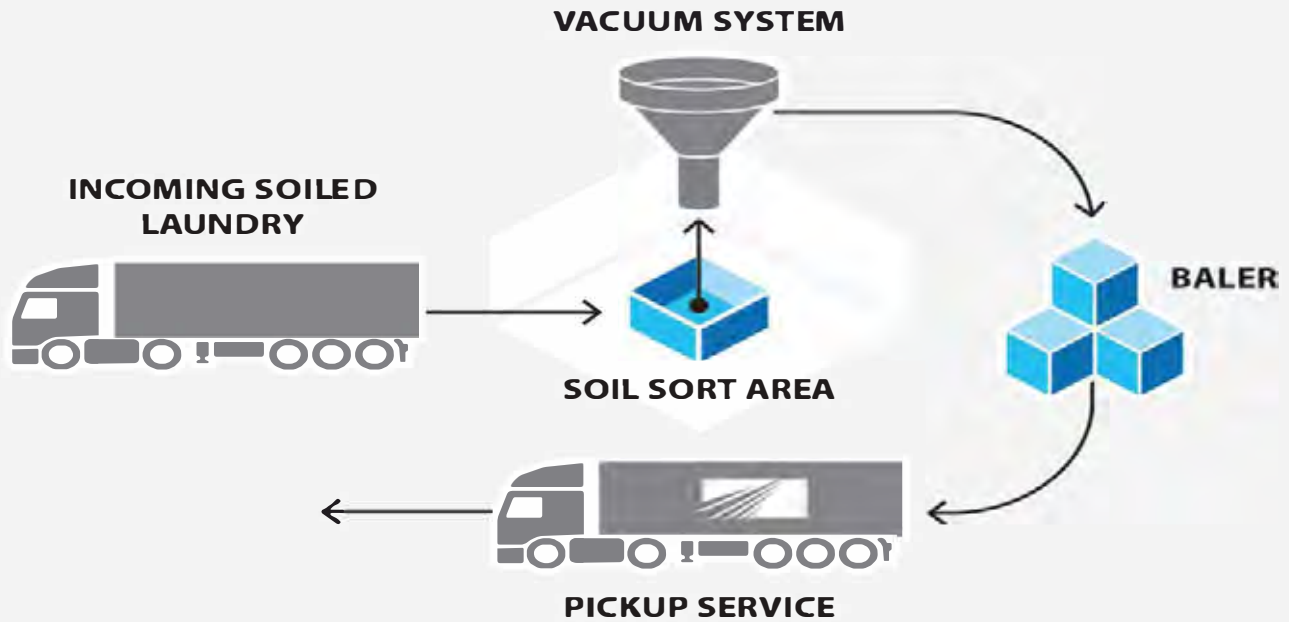

Whether you are selling soiled linen bags to hospitals or not, our competitive pricing coupled with our hamper stand program can increase your bottom line and help win new business.

# Turnkey Plastic Recycling Program

**Vacuum System** - Our Vacuum system will help you reduce your labor costs. There is no longer a need to have dedicated workers constantly moving plastic bags from your soil sort area to your baler. We offer our vacuum system at a cost less than that of competitors, to assure you an even faster return on investment.

**Baler** - Streamline Solutions will install a baler at your facility as long as you are purchasing our plastic bags. This allows soiled linen bags of all colors, sizes and styles to be recycled more efficiently.

**Free Pickup** - Once you have the agreed upon number of bales, call our office and, at no cost, we'll send a truck to pick them up and reclaim the plastic into reusable pellets.

STREAMLINE SOLUTIONS™

## Who are we?

Streamline Solutions are the laundry experts.

Our systems provide automatic recovery of soiled linen bags and plastic waste from soil lines to significantly improve productivity, use less manual labor, improve the working environment, enable recycling of waste material, reduce health risks.

## Why choose us?

Streamline Solutions are the laundry experts.

Our systems provide automatic recovery of waste and trim from production machines and processes to significantly improve productivity, use less manual labor, improve the working environment, enable recycling of plastic material and reduce health and safety and fire risks.

## We care...

We provide:

- High quality installations
- Engineering support
- Maintenance schedule planning
- Recommended spares supply
- Full operator training
- Operating & maintenance manuals
- CE/UL certificates
