Preffered Machine Direction:

Left Handed

Right Handed

(Machine direction is determined by the normal operator's position in relation to the infeed conveyor. When the operator is facing the shrink wrapper and the product is coming from the right, the machine is right-handed.)

How Will Products be Introduced to the Wrapper?

Hand Fed (Workers placing product by hand onto wrapper)

Random (No specific spacing between products)

Conveyor (Product is fed end-to-end with no separation between units)

Lug (Products arrive in groups with random empty gaps)

Pitch (A consistent set spacing between each product with no variation)

Other (specify):

Does the Application Require Product Guides? Yes No

Are there special Height Requirements for the machine? If so, please list height in inches. __
